BOXING BUGS

GAME PLAY

BOXING BUGS offers explosive challenges in a fast-paced game of action. The player's double loaded rapid fire cannon shoots fireballs and controls punching of a boxing glove to score against the Bugs. Players must react quickly using rotation and fire buttons to knockout bugs and keep them from bombing their octagonal protective wall in the center of the screen. The action intensifies as new bugs appear, each with a motive to maneuver bombs into the player's territory.

Players become vulnerable as wall segments are destroyed by bombs. Bugs can then destroy the player's cannon. Thus, the objective is to keep the bugs and the bombs away! The quick response cannon can move the bombs away with fireballs and knockout bugs using the boxing glove. The score goes up as bugs are eliminated. At the same time, new bugs appear and difficulty increases.

Flying bugs appear with the power to destroy the wall segments and the cannon. The boxing glove is the only defense to knock out these bugs before they strike. Bonus rounds are awarded with different play action features to give BOXING BUGS even more variety and increased play appeal.

There is extra challenge to achieve higher boxing weight classifications that are listed between rounds, from "Sporing Partner" through 7 levels to "Heavy Weight", this offers another incentive for players to keep on trying to achieve better levels. The many different scoring opportunities and continuously changing play action allow players to try many different strategies, increasing skill with practice, players will work to be one of the highest scores and list their initials in the attract mode.

GAME FEATURES

- A full color X-Y Monitor gives BOXING BUGS colorful visual attraction.
- One or two players can challenge the BOXING BUGS and compete for highest scores on this game.
